<i>The colour plates referred to in Chapter 7 appear between pages 270 and 271</i>	
Chapter 1: Practical nursing skills: a caring approach	1
What are practical nursing skills?	1
Practical skills included in this book and the use of practice scenarios	4
Practical skills: affective, cognitive and motor dimensions	5
A caring approach to practical nursing skills	8
Cultural competence and practical nursing skills	12
Patient/client dignity and practical nursing skills	14
How can you develop your practical nursing skills?	17
Recommended reading	25
Chapter summary	25
References	26
Useful websites	29
Chapter 2: The nurse's approach and communication: foundations for compassionate care	30
Practice scenarios	30
Understanding what influences the nurse's approach to care	32
The communication process	41
Developing and maintaining therapeutic relationships	49
Communication in challenging situations	54
Chapter summary	61
References	62
Chapter 3: Preventing cross-infection	65
Practice scenarios	66
Principles for preventing healthcare-associated infection: an introduction	67
Hospital environmental hygiene and multi-use equipment	74
Hand hygiene	76
Use of personal protective equipment, including gloves, aprons and gowns	84
Aseptic technique	88
Specimen collection	92
Isolation procedures	97
Sharps disposal	103
Healthcare waste disposal and linen management	106
Chapter summary	112
Acknowledgement	112
References	112
Chapter 4: Measuring vital signs	116
Practice scenarios	117
Equipment required for this chapter	118

Measuring and recording temperature	118
Measuring and recording the pulse	126
Measuring and recording respirations	130
Measuring and recording blood pressure	134
Measuring oxygen saturation by pulse oximetry	141
Neurological assessment	145
Chapter summary	154
Acknowledgement	155
References	155
Chapter 5: Administering medicines	158
Practice scenarios	159
Legal and professional issues in medicine administration	160
Safety, storage and general principles of medicine administration	168
Administering oral medication	173
Applying topical medication	176
Administering medication by injection routes	180
Administering inhaled and nebulised medication	190
Intravenous fluid and blood administration	197
Calculating medicine and intravenous fluid administration doses	201
Preventing and managing anaphylaxis	206
Chapter summary	207
Answers to exercises	208
References	209
Chapter 6: Caring for people with impaired mobility	213
Practice scenarios	214
Pressure ulcer risk assessment	215
Pressure ulcer prevention	223
Prevention of other complications of immobility	229
Key principles of moving and handling patients	235
Assisting with mobilisation and preventing falls	237
Chapter summary	242
References	242
Chapter 7: Principles of wound care	247
Practice scenarios	248
The phases of wound healing	249
Classification of wounds and wound closure	254
Factors affecting wound healing	258
Wound assessment	263
Wound management	269
Chapter summary	281
Acknowledgement	282
References	282
Useful websites	286
Chapter 8: Meeting hygiene needs	287
Practice scenarios	288
Rationale for meeting hygiene needs and potential hazards	289

Bathing a person in bed	292
Washing a person's hair in bed	298
Bathing and showering in the bathroom	300
Facial shaving	305
Oral hygiene	307
Last offices	314
Chapter summary	318
Acknowledgement	318
References	318
Chapter 9: Meeting elimination needs	321
Practice scenarios	322
Assisting with elimination: helping people to use the toilet, bedpans, urinals and commodes	323
Urinalysis	330
Collecting urine and stool specimens	335
Caring for people with urinary catheters	342
Preventing and managing constipation	356
Stoma care	364
Promoting continence and managing incontinence	371
Chapter summary	386
Acknowledgement	387
References	387
Chapter 10: Assessing and meeting nutritional needs	394
Practice scenarios	395
Nutrition in healthcare: addressing the concerns	396
Recognising the contribution of nutrition to health	398
Promoting healthy eating in care settings	403
Nutritional screening	406
Assisting people with eating and drinking	413
Additional nutritional support strategies	419
Enteral and parenteral feeding	422
Chapter summary	433
Acknowledgement	433
References	433
Chapter 11: Assessing physical health and responding to sudden deterioration	436
Practice scenarios	437
Equipment required for this chapter	439
Recognising and responding to deteriorating patients/clients: an overview	439
Airway management problems and related skills	444
Breathing problems and related skills	454
Circulatory problems and related skills	462
Unconsciousness and related skills	471
Chapter summary	477
References	477
Useful websites	480
Chapter 12: Managing pain and promoting comfort	481
Practice scenarios	482
Managing pain in a variety of settings	483

Promoting comfort	503
Chapter summary	513
References	513
Useful websites	517
Appendix	518
